

CMPS 183 - FALL 2016

Seongwoo Choi & Erik Andersen

Seongwoo Choi

Chief Executive of User Interface and Programming

Initial Idea

How we approached this project

- Why do we need this website in the first place?
- How did we go about making it?
- How could we make it better than what is already there?
- How could we make this more interactive?
- Is it possible in the first place?

Our website should be

- More vibrant
- More interactive
- More beautiful

How can we make it so much better than now?
